<sup>\*</sup>Solar Choice is a limited program available only to eligible customers that elect PG&E as their electric service provider. For more information please refer to pge.com/solarchoice.

Monthly usage: 1,298

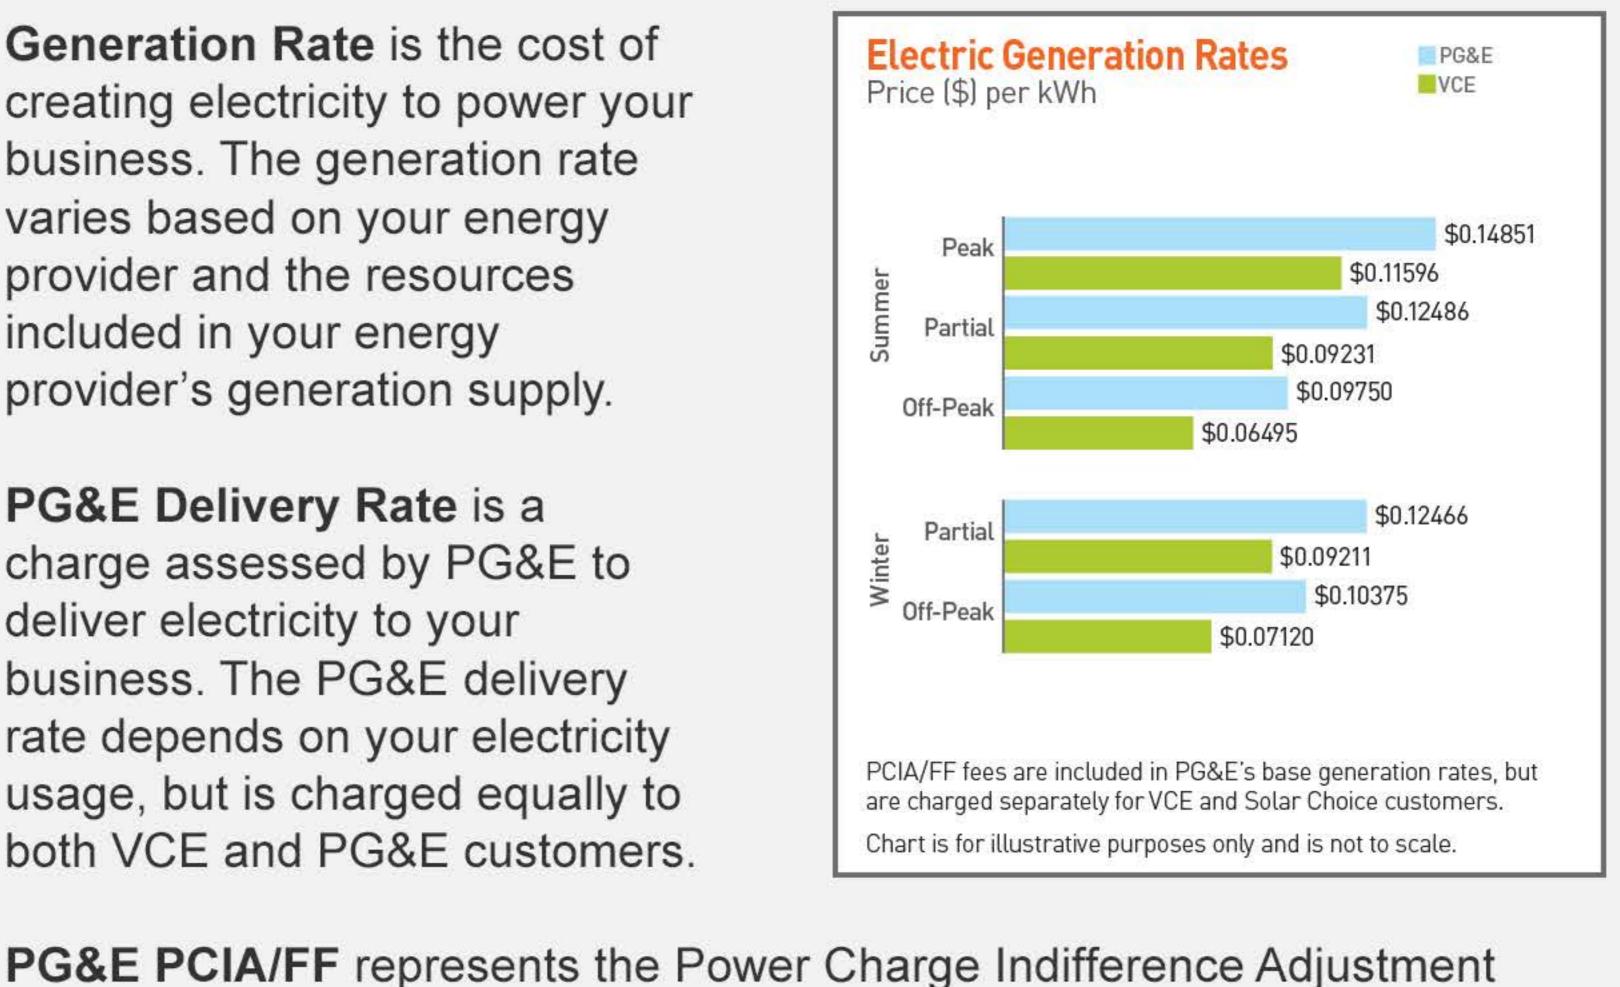

### Current rates as of May 2020

This table compares electricity costs for an average commercial customer in the VCE/PG&E service area with an average monthly usage of 1,298 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on A-1X rate schedules for PG&E's and VCE's published rates as of May 2020.

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both VCE and PG&E customers.

PG&E Delivery Rate is a

(PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

Monthly usage: 486

### Current rates as of May 2020

This table compares electricity costs for an average residential customer in the VCE/PG&E service area with an average monthly usage of 486 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-1 rate schedules for PG&E's and VCE's published rates as of May 2020.

Generation Rate is the cost of creating electricity to power your home. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your home. The PG&E delivery rate depends on your electricity usage, but is charged equally to both VCE and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

For inquiries, please do not reply to this email. Submit feedback via Contact Us. "PG&E" refers to Pacific Gas and Electric Company, a subsidiary of PG&E Corporation.

<sup>\*\*</sup>Unspecified sources of power refers to electricity that is not traceable to a specific generating facility, such as electricity traded through open market transactions. Unspecified sources of power are typically a mix of all resource types, and may include renewables.

# We support your power to choose

As part of our mutual commitment to support your energy choice, Valley Clean Energy (VCE) and Pacific Gas and Electric Company (PG&E) have partnered to provide you with a comparison of typical commercial electric rates, average monthly charges, and sources of energy generated.

| Commercial Electric Rate<br>Comparison, E-19S | PG&E       | PG&E<br>Solar Choice* | Valley Clean<br>Energy | VCE<br>UltraGreen |
|---|------------|-----------------------|------------------------|-------------------|
| Generation Rate (\$/kWh)                      | \$0.11179  | \$0.07332             | \$0.07966              | \$0.09466         |
| PG&E Delivery Rate (\$/kWh)                   | \$0.09570  | \$0.09570             | \$0.09570              | \$0.09570         |
| PG&E PCIA/FF (\$/kWh)                         | N/A        | \$0.04013             | \$0.03213              | \$0.03213         |
| Total Electricity Cost (\$/kWh)               | \$0.20749  | \$0.20915             | \$0.20749              | \$0.22249         |
| Average Monthly Bill (\$)                     | \$5,100.95 | \$5,141.76            | \$5,100.95             | \$5,469.71        |

<sup>\*</sup>Solar Choice is a limited program available only to eligible customers that elect PG&E as their electric service provider. For more information please refer to <a href="mailto:pge.com/solarchoice">pge.com/solarchoice</a>.

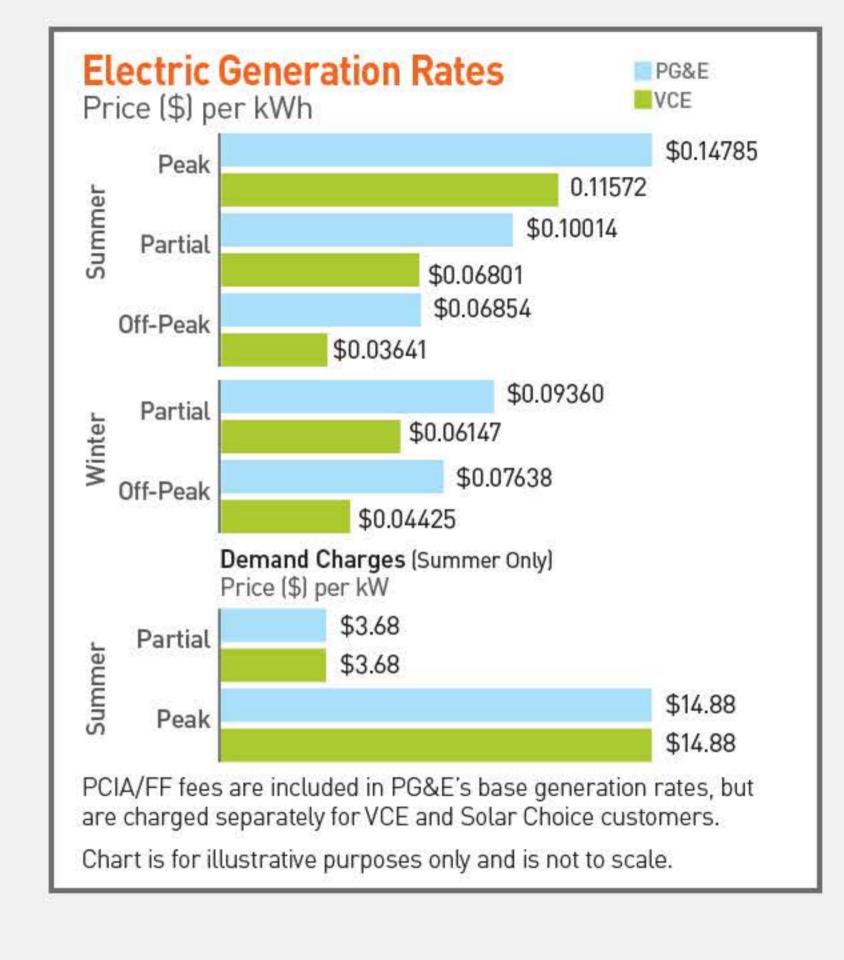

Monthly usage: 24,584 Monthly demand: 60

#### Current rates as of May 2020

This table compares electricity costs for an average commercial customer in the VCE/PG&E service area with an average monthly demand of 60 kilowatts (kW) and an average monthly usage of 24,584 kilowatt-hours (kWh). This is based on a representative 12-month billing history for all customers on E-19S rate schedules for PG&E's and VCE's published rates as of May 2020.

Generation Rate is the cost of creating electricity to power your business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your business. The PG&E delivery rate depends on your electricity usage, but is charged equally to both VCE and PG&E customers.

(PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's above-market costs for generation resources acquired prior to a customer's switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E's optional Solar Choice program. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment
