Re: Request for Proposals (RFP) for Enterprise Resource Planning (ERP) (RFP No. 2026-VCE-ERP)

Valley Clean Energy (VCE) would like to thank you for the considerable time and effort in submitting proposals in response to RFP No. 2026-VCE-ERP (RFP for Enterprise Resource Planning).

After careful consideration, VCE is withdrawing RFP No. 2026-VCE-ERP and delaying the project for January 1, 2028, "go live" date. VCE and its partners are fully committed to the project, but understand that the proposed timeline in the RFP did not have enough allowance for contingencies and unplanned delays.

VCE's plan is to reissue the RFP in Quarter One (1) 2027, aim for an award in Quarter Two (2) 2027, with a project kickoff in Quarter Three (3) 2027. The additional time will allow for sufficient time for planning, implementation, testing, and training ahead of the January 2028 "go live" goal and allow for greater coordination, more thorough preparation, and a smoother transition for all parties involved.

VCE looks forward to reengaging with you in the new year.

Please check our website for future RFP opportunities.

Sincerely,

Edward Burnham
Chief Financial Officer
Valley Clean Energy
