VALLEY CLEAN ENERGY

AGRICULTURAL CUSTOMER TOOLKIT

WHY VALLEY CLEAN ENERGY?

Valley Clean Energy (VCE) is a locally controlled, board-governed provider of clean and renewable electricity at competitive rates. At VCE, we understand the impact agricultural businesses and families have in shaping local policy and economic decisions in Yolo County. It is important to VCE's mission to earn your support so that together we can deliver clean and competitively priced electricity to the cities of Woodland, Davis, and the unincorporated areas of Yolo County.

Our goal is to ensure that you are well informed about your energy choices and how local control benefits your business. With the support of agricultural leaders like you, VCE is working to help make our region a better place for farms, ranches, and ag-related businesses.

GUIDE OVERVIEW

We encourage you to use this guide to see why VCE is the smart and sustainable choice for your business.

ABOUT VALLEY CLEAN ENERGY (VCE)

Here is some quick information about Valley Clean Energy:

- » Valley Clean Energy, also known as VCE, will provide clean electricity and competitive rates to all energy customers in the cities of Woodland, Davis, and unincorporated areas within Yolo County.
- » Valley Clean Energy will offer local control and transparency. We will work with you to ensure accountability. We are serving you, not shareholders.
- » Valley Clean Energy is governed by a six-member Board of Directors, two each from the Woodland City Council, Davis City Council, and the Yolo County Board of Supervisors.
- » Our Board of Directors is advised by its 9-member Community Choice Energy Advisory Committee.
- » Valley Clean Energy is set to begin providing competitive rates on cleaner energy to customers on June 1, 2018.
- » If your home or business is in our providing area, you will be automatically enrolled in LightGreen, our select option with cleaner energy and rates that are competitive with PG&E. You can choose to upgrade to our prime option, UltraGreen, to receive 100% clean energy at a slightly higher rate, or opt-out to return to PG&E's service.
- » Other than receiving cleaner electricity at competitive prices, all other aspects of your electricity service remain the same. PG&E will continue to maintain the transmission and distribution system and handle meter reading and billing. As a VCE customer, you will retain access to any programs or special rates in which you are currently enrolled.
*Note: PG&E rates for transmission and distribution cannot be set differently for VCE customers. If they change these rates for VCE, they must charge their own customers the same amount.

HOW IT WORKS

SOURCE CCE (VCEA)

Valley Clean Energy pools the electricity demands of our customers and purchases power with higher renewable and lower GHG content than is offered by PG&E.

DELIVERY UTILITY (PG&E)

PG&E continues to deliver the electricity, restore service during outages, maintain the power lines, read your meter, and send you a single, consolidated bill, as required by state law.

CUSTOMER YOU

You'll receive cleaner energy at competitive rates without doing a thing!

ENROLLMENT PROCESS

Here's how the Valley Clean Energy enrollment process works:

- 1 Enrollment is automatic, so you can start receiving cost-competitive, cleaner power with no effort.
- 2 VCE service begins on June 1, 2018.
- 3 Electricity customers will be automatically enrolled in VCE's select product, LightGreen.
- 4 You may opt-out of our services and return to PG&E at any time
- 5 You have the opportunity to opt-up to ultragreen to receive 100% clean energy
- 6 If you opt-out within the first 60 days of service and change your mind, you may re-enroll at any time. If you opt-out after the first 60 days, you will need to wait 12 months before opting back into VCE.

ENERGY OPTIONS

All VCE customers can choose from two different product options.
Each product has a different amount of sustainable energy.

VCE'S SELECT OPTION LIGHTGREEN

All customers are automatically enrolled for this product in June 2018.

Rates 2% below PG&E's generation rates.

Higher renewable energy compared to PG&E.

VCE'S PRIME OPTION ULTRAGREEN

For customers who want to source 100% of their energy renewable sources.

This option is 100% renewable and 100% carbon-free.

Slightly higher rates when you opt-up.

If you opt-out and return to PG&E within 60 days of service, you may re-enroll with VCE at any time. If you opt-out after the first 60 days, you will need to wait 12 months before opting back into VCE.

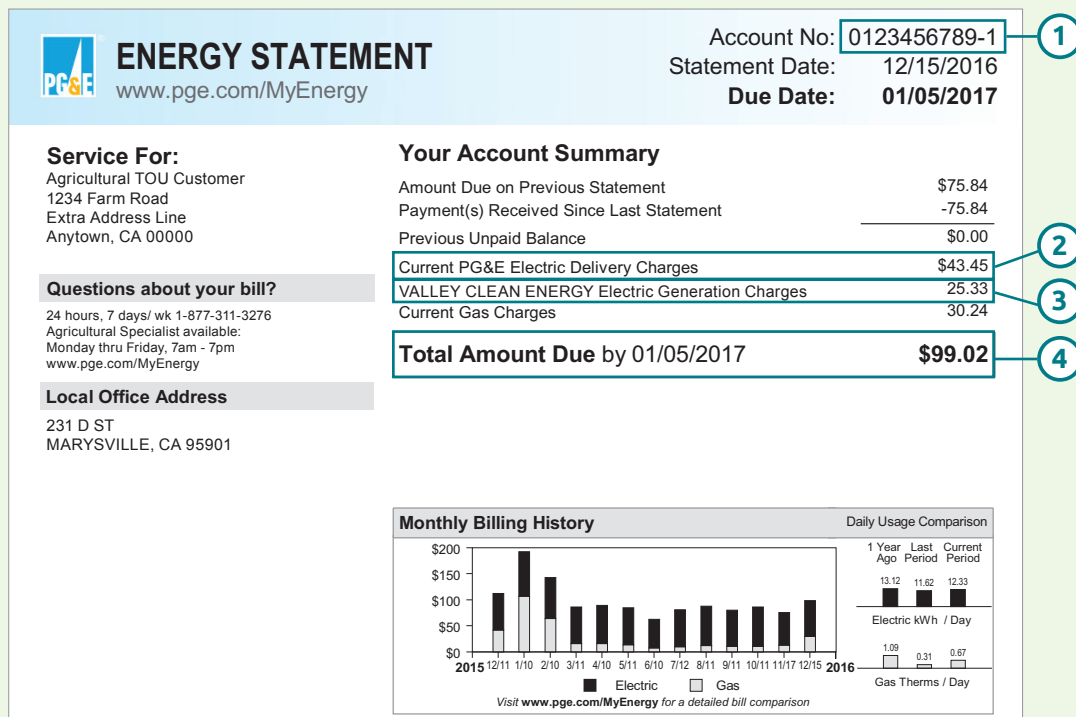

COST AND RATES

Keeping costs low is our priority. By choosing Valley Clean Energy, you are keeping rates competitive to provide clean, renewable power for your business and community. To make it easy, we partner with PG&E to send you a single, consolidated bill. Here is the change you can expect to see on your future bills:

1 Electric Generation. This is the source of your power and how much electricity you're using. VCE replaces PG&E's charges for Electric Generation.

2 Electric Delivery. This is the same for VCE customers and non-VCE customers. PG&E Electric Delivery charges stay the same.

SAMPLE BILL

1 Account Number
This is where you will find your existing PG&E account number.

2 Electric Delivery Charges
This is PG&E's charge for the delivery of electricity to your business. It includes transmission, distribution, and a variety of other fees. It does NOT include generation charges if you're a VCE customer.
This rate will not change if you're a VCE customer.

3 VCE Electric Charges
This is VCE's charge for generating the cost of electricity that powers your business. **This charge replaces what PG&E would otherwise charge.**

4 Total Amount Due
The total amount due includes ALL of your fees for PG&E gas services and electric delivery, and VCE electric generation services. You should remit the total amount due on your bill to PG&E, as indicated.

PG&E does add additional fees to your bill, and those are always included in the cost comparisons. Our sample rates table will show direct comparisons of PG&E's TOU and fixed price Ag rates with what Valley Clean Energy will offer. PG&E will charge VCE customers a Power Charge Indifference Adjustment (PCIA) and Franchise Fee Surcharge in order to ensure that customers who switch to Valley Clean Energy pay for energy that was acquired by PG&E to serve them prior to their switch.

FAQS

Does Valley Clean Energy replace PG&E?

No, VCE works in cooperation with PG&E. VCE sources and buys cleaner electricity for our customers, and PG&E continues to deliver that electricity to your farm, ranch, or business. PG&E will also continue to handle the billing, maintain power lines, and resolve any outages.

How will this affect the cost of my bill?

VCE will offer your business competitive pricing compared to current PG&E rates. Our 2018 target rate is 2% below PG&E's rate with our LightGreen product option.

Can I return to VCE if I opt out?

Customers who opt out within the first 60 days of VCE service may return to VCE at any time. Customers who opt out after the first 60 days of service with VCE must wait one year before returning to VCE.

Will VCE have a single rate structure?

The VCE Board of Directors is in the process of setting its electricity rates in an open and public process. VCE is currently evaluating different options for the rate structures. Mirroring PG&E's rate structure at launch would provide a direct comparison in evaluating the rates. VCE is committed to working with commercial, agricultural, and industrial customers to determine how the rates will work for their businesses. Business owners are encouraged to attend upcoming meetings to provide input on the potential rate structures.

What if I have multiple accounts?

Owners of multiple accounts can choose to opt up or opt out individual accounts. Enrollment is by account, so you'll be able to see all your accounts and decide which choice is best for each one.

What if I have existing direct access arrangements or special PG&E rates?

Any existing direct access arrangements or special PG&E rates will not be automatically enrolled in VCE's program. However, those customer can choose to become VCE customers. Special direct access termination provisions may apply.

Will I receive any retribution from PG&E by switching to VCE?

Of course not. VCE works in collaboration with PG&E for the energy change. The only difference will be where your energy will be sourced.

Where will VCE get its electricity?

The majority of our energy will be produced from clean energy sources such as hydro, solar and wind. The power portfolio will be developed in early 2018. Our intent is to purchase as much electricity as possible from sources located in California at prices that remain competitive with PG&E.
